
The two-dimensional space, both axes available at run time
unfamiliar,
but predictable
unfamiliar AND
intrinsically variable
familiar,
tracking
familiar but
intrinsically variable
10^{0}
10^{-1}
10^{-2}
10^{-2}
10^{-1}
σ^2_{epi} — disagreement
σ^2_{alea} — intrinsic unpredictability
LG (level ground)
RA (ramp ascent)
RD (ramp descent)
SA (stair ascent)
SD (stair descent)
TR (transitions)
ST (standing)
Quadrant occupancy by task
(each axis split at its own 99.5th percentile)
% of the task's windows
100
80
60
40
20
0
low both (familiar)
high alea only (variable)
high epi only (unfamiliar)
high both
