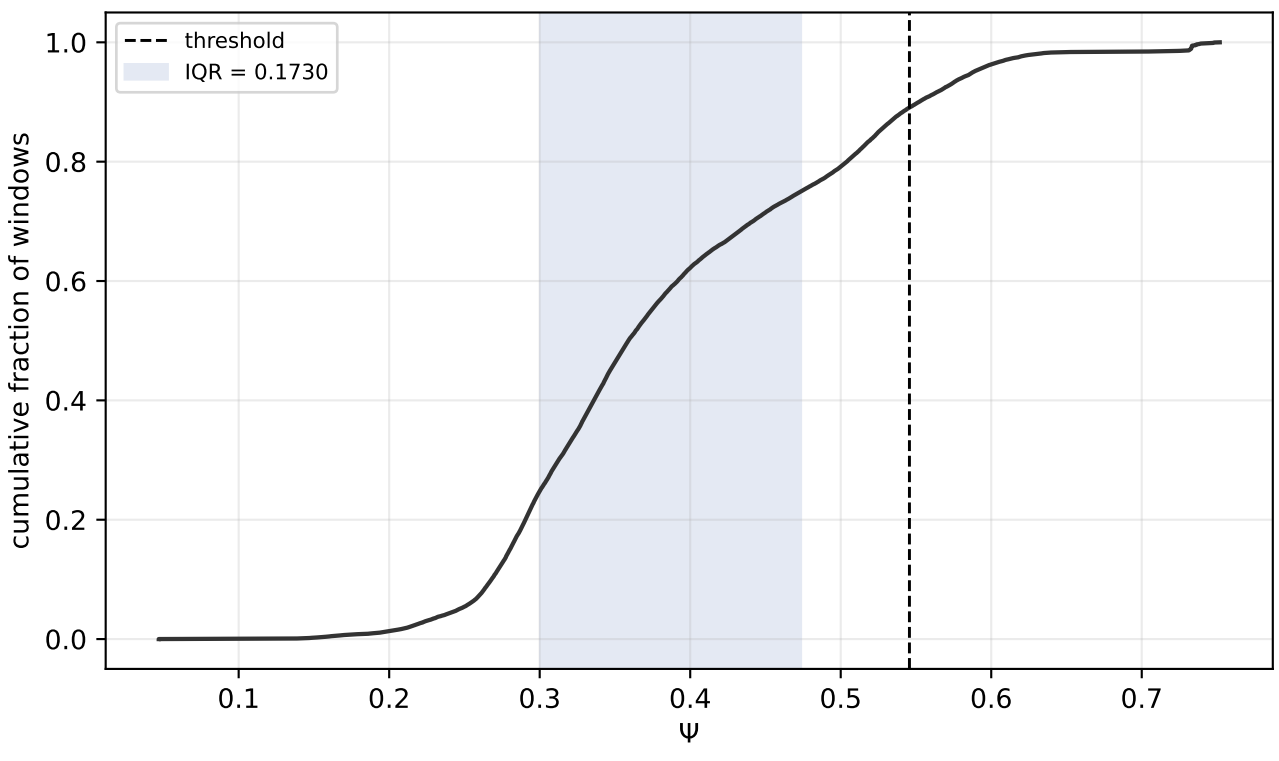
Score distribution by label
ID (n=57,445)
held-out (OOD) (n=27,554)
99.5th pct of ID train = 0.5457
density
$\Psi = 1 - D(x)$



Saturation check — a near-vertical curve at Ψ ≈ 0
means the discriminator has won and the score is dead
threshold
IQR = 0.1730
cumulative fraction of windows
Ψ
